
a
amplitude, exit plane (terrace B)
|ψ|/|ψinc|
z − zs (Å)
y [−110] (Å)
b
phase arg ψ − k0(z − zs)
rad
π
0
−π
c
angular spectrum per rod
vacuum spectral intensity
m = 0 (specular)
m = ±1
m = ±2
elastic √(θ² − (mλ/b)²)
±1 mrad aperture
exit angle kz/K (mrad)
d
height above surface in exit plane h (Å)
terrace A
terrace B
not illuminated
|ψ00|² / |ψinc|²
surface hit point x = L − h/θ (μm)
e
arg ψ00 − arg ψ00(A) (rad)
geometric 2Kh sinθ (mod 2π)
surface hit point x (μm)
